<i>Offer No.</i>	<i>115406</i>
Summary of offer	Agricultural Products and Consulting
<p>Our Group is an association between Latin American, European and Israeli partners, active in nutri-phytosanitary solutions for agriculture, crop managing and other areas in the agro-sector.</p> <p>The Group's range of innovative products give added value as they are beneficial to both the distributor, who wants to offer a better service to his customers, and the farmer who wants an exceptional crop yield without the hassle of financial and environmental penalties.</p> <p>Some advantages of the products:</p> <ul style="list-style-type: none"> • Can be applied safely right up to harvesting time without leaving residual traces. • Speedy, real-time effect on overall crop health improvement. • Critical nutrients feed the plants without major leaching. Fewer applications are needed because the products can be mixed with each other to provide maximum effect. Formulations are poly stable and low in salt. • High translocation efficiency of available nutrients. • Increases plant longevity. • All of the products follow EU highest standards and regulations while being safe to use without wasting the plant's energy. <p>Even after 25 years of experience and hard work, our Group is still as committed as ever to a greener, innovative future in agriculture. Our Motto is "Excellence in Service" and we offer all our customers a truly better option for unequalled quality and service.</p>	
Potential Partners	Private Farmers, Distributors.
Target Countries	EU, UAE, North & South America, Asia, Africa.

<i>Offer No.</i>	<i>115411</i>
Summary of offer	Gravity Micro-Irrigation Solution
<p>Our company's aim is to lead the effort in solving the global water shortage by providing the farmers the ultimate alternative to flood irrigation, enabling farmers a precise, cost-efficient, and sustainable solution through our gravity-powered micro-irrigation system.</p> <p>The only drip irrigation system, which does not require pumps, booster or filtration, Designed to provide efficient drip irrigation with 0.05 bar pressure (50 cm water height), can work with Resilient to natural (dirty) water.</p> <p>Gravity-powered only, no additional energy, full solution for short fields (the one acre kit allows full 100 meters length of letarls span, long fields (up to 600 m and more), no need for filters, minimal infrastructure, low Initial investment, no energy costs, our solution offers the farmers the full ability to convert to drip irrigation without the high expenses in the initial investment and ongoing expenses.</p> <p>We do not rely on external energy, instead making use of the field topography and gravity power to reduce conversion costs and increase operational efficiency with the goal of conserving water and fertilizer while increasing yields.</p> <p>Our company received the Overall Award for Excellence in Disruptive Technologies at the Transformational Business Awards.</p>	
Potential Partners	Distributors with access to local growers and farmers, large food companies and agricultural unions.
Target Countries	Worldwide

Offer No.	115456
Summary of offer	Unique Platform to Managing Workers' Safety and the Factory in Real Time
<p>This Israeli company was founded back in 2015 and was established to help managing workers' safety and the factory in real time.</p> <p>The team combines experts in both organizational safety and artificial intelligence technologies, who relentlessly strive to crack the challenge of workplace safety.</p> <p>This cloud-base SaaS (software as a service) platform uses Artificial Intelligence to automatically track massive data and connect silos of information, from the crowd wisdom on the shop floor, to machines, sensors, wearables and the organization ERP systems .</p> <p>Industry 4.0 technologies are applied to converge massive data, evaluate the risks and recommend personalized safety actions. The company issues individual work orders, location-based warnings, unsafe situation predictions and even equipment use blocking if needed .</p> <p>It has developed a synchronization and management system for the prevention of work accidents that integrates all the systems that operate the plant and makes the information accessible in a customized manner.</p> <p>The system works on the basis of real-time reporting and documentation, alerts about changes in the condition of the devices or temperatures and thus maintains the safety of workers and the factory.</p> <p>This platform helps manufacturers, chemical companies or oil and gas plants to prevent accidents, reduce risks and cut down costs.</p> <p>Today the company operates in about 45 factories around the world, mainly in Europe, USA, China and Singapore.</p> <p>The company's main customers are mostly from the fields of drilling rigs, fuel production, chemistry, shipbuilding and wharves, power plants and energy. In developed countries (USA and Europe mainly) the company's main customers are factories and medium-sized companies. In developing countries - aimed at large companies.</p>	
Potential Partners	<p>Distributors in the field of software implementation and the world of safety.</p> <p>Looking for connections to other customers in the industry that may explode petrochemical plants, refineries, mines and shipyards (ports).</p> <p>The company also seeks assistance in locating: resellers, distribution channels integrators focusing on segments of gas, fuel and chemistry.</p> <p>The company is also interested in collaborations with TIC (Testing, inspection and certification) companies.</p>
Target Countries	Worldwide
