

TECHNOLOGY TRANSFER E-BULLETIN

Date: 01.06.2021

1	Summary	Reference	Full text
	A Spanish SME devoted to biomolecular analysis for the environment requests collaboration to complete its experiments to develop new solutions to improve hydrocarbon contaminated soils bioremediation. The company looks for partners working with bioreactors that can provide samples. The SME is willing to reach a service agreement or a technical cooperation agreement.	TRES20210507001	https://een.ec.europa.eu/tools/services/PRO/Profile/Detail/6b8ea5dc-36bb-49a9-b287-3d18adf6cab9 Request the address
2	Summary	Reference	Full text
	A Spanish public body is looking for know how and innovative developments already implemented successfully in the public administration in different fields: elearning, digitalisation, sustainability, accesibility, citizens and others. Services agreement or technical agreements are sought.	TRES20210513001	https://een.ec.europa.eu/tools/services/PRO/Profile/Detail/94d39727-d51d-4c77-8574-425d8c9c7fb8 Request the address
3	Summary	Reference	Full text
	An Italian woodworking company is looking for a producer of in-line hot presses for wood for developing a new wood-based material of different geometries, under research cooperation agreement. The company is looking for a partner who can implement the compression/pressing of wood-based mixture materials at high temperatures, i.e. between 150-200°C (veneer presses are not considered). In particular, rod-shaped or partly flat wood elements should be pressed.	TRIT20210518001	https://een.ec.europa.eu/tools/services/PRO/Profile/Detail/03e89d35-6069-41c8-866d-cef6a4077ae4 Request the address
4	Summary	Reference	Full text
	Dutch beer brewer is looking for innovative solutions to quickly recover post consumer glass packaging from the consumer and return it to their converters or to recycling companies creating closed loops and increasing the recycled content. For this the brewer is interested in concluding a technical cooperation agreement. This profile is part of an open innovation challenge.	TRNL20210519001	https://een.ec.europa.eu/tools/services/PRO/Profile/Detail/47c37ea0-d56c-41d0-8678-b68fd63566e2 Request the address
5	Summary	Reference	Full text
	A French company in the childcare industry is looking for eco-friendly materials (recycled and bio-based materials) in plastics and packaging industries. The company researches solutions for future development to include in their range of products for babies. The company wants to establish technical cooperation agreement or manufacturing agreement.	TRFR20210518001	https://een.ec.europa.eu/tools/services/PRO/Profile/Detail/406cbbf6-27b9-44f3-bf24-d6890d52eed7 Request the address
6	Summary	Reference	Full text
	An Italian multi-specialty clinical centre providing both inpatient and outpatient services mainly in the neurological field is interested in the study of neurodegeneration with the need to identify genetic and biological markers for the neurological diseases treated into the clinic. The clinical centre seeks universities, research centers and companies for collaboration under technical or research agreement.	TRIT20210513001	https://een.ec.europa.eu/tools/services/PRO/Profile/Detail/aaa9fc32-fa3a-42fe-9e8f-57ad696160a8 Request the address
7	Summary	Reference	Full text
	The Spanish regional public body has published an innovative public procurement contract (PPI) in cybersecurity. The objective is developing a proof of concept that make possible the detection and monitoring of illegal services and to be able to eliminate them. The public tender will be open until May 14, 2021 for submitting offers. The partner sought are SME, academia or R&D centres, under technical cooperation agreement or commercial agreement with technical assistance.	TRES20210504001	https://een.ec.europa.eu/tools/services/PRO/Profile/Detail/46fb746a-adc8-4f49-a305-c8e9cefafe26 Request the address
8	Summary	Reference	Full text
	A Turkish SME who is active in the digital and physical printing sector is looking for ways to reuse photopolymer for flexo plate production which is a waste material gained during the production of flexo plates themselves. Businesses with knowledge in this field are invited into research or technical cooperation.	TRTR20210426001	https://een.ec.europa.eu/tools/services/PRO/Profile/Detail/5ac7ba1b-0852-4063-a888-814da8690c50 Request the address
9	Summary	Reference	Full text
	Dutch company is an impact company that makes chocolate. Their mission is to change the cocoa industry which is characterized by low incomes of cocoa farmers and weak governance, exacerbating poverty and a variety of environmental and social issues such as modern slavery and illegal child labour. They are looking for companies that share their vision and have ideas for sustainable but also sturdy paper packaging for chocolate bars. A cooperation agreement will be provided.	TRNL20210520001	https://een.ec.europa.eu/tools/services/PRO/Profile/Detail/32713488-f1f7-4d5d-8110-0a407ed21551 Request the address
10	Summary	Reference	Full text
	A UK company is foaming mineral mixes with viscosity similar to toothpaste, into low density panels with good thermal conductivity. Conventional propellants and peroxides produce bubbles considered to be too big. Industry or academia with expertise in forming fine bubbles to improve mechanical and thermal properties, are being sought for technical cooperation followed by license or commercial agreement with technical assistance.	TRUK20210526001	https://een.ec.europa.eu/tools/services/PRO/Profile/Detail/1e0eac1b-929f-4252-b36c-ee729f23b5be Request the address
11	Summary	Reference	Full text
	A UK-based SME is developing an innovative electronic mini device designed for football and sports referees. This innovation is at early prototype stage and is aiming to replace the traditional red/yellow cards and notebook method used in matches, requiring a referee. A technical cooperation agreement is sought for further development of the prototypes including its design, hardware and software. The SME is also seeking partners for routes to market and sales, via a commercial agreement.	TRUK20210519001	https://een.ec.europa.eu/tools/services/PRO/Profile/Detail/a24f9c96-7df8-44e7-a14f-85f3f0ad9a34 Request the address

12	Summary	Reference	Full text
	A Spanish company specialised in the production of spreadable creams and pâtés is looking for, on the one hand, added-value formulations based on the introduction of additives, natural ingredients or functional ingredients, and, on the other hand, technologies to improve the manufacturing process and the heat treatments to increase the quality and shelf life of spreads and pâtés. The company is seeking commercial agreements with technical assistance or technical cooperation agreements.	TRES20210525001	https://een.ec.europa.eu/tools/services/PRO/Profile/Detail/05e4ca4f-05e2-47e8-9841-29be9fac427 Request the address
13	Summary	Reference	Full text
	A Dutch healthcare organization provides care and guidance to people with intellectual disabilities. They run an on-line digital product which provides 24/7 remote care by professional counsellors. The organization is looking for technical and strategic partners to take the current product to the next level, both on the side of the user and on the side of the operator. A commercial agreement with technical assistance, a license agreement or a technical cooperation agreement is aimed for.	TRNL20210503001	https://een.ec.europa.eu/tools/services/PRO/Profile/Detail/ea319256-8d76-4a01-ac28-837afe43d5a6 Request the address
14	Summary	Reference	Full text
	A Bavarian Start-up, founded in 2020, offers the service to develop technical ceramic products according to customer ideas. For the development of an exhaust gas cleaning system, a partner from the field of high-temperature brazing for technical ceramics is sought as a manufacturing agreement by subcontracting	TRDE20210511001	https://een.ec.europa.eu/tools/services/PRO/Profile/Detail/1af3bdde-1d89-4ac0-a2fc-37dff1f58cca Request the address
15	Summary	Reference	Full text
	A UK company working with sleep disorder solutions is developing a new mobile app to help people overcome insomnia. They are seeking researchers or experts who have experience in creating medical questionnaires to work with them to develop a tailored list of questions as part of the mobile app, via technical cooperation agreement.	TRUK20210517001	https://een.ec.europa.eu/tools/services/PRO/Profile/Detail/68b3967d-eb71-4f5b-88bd-57a95145fab4 Request the address
16	Summary	Reference	Full text
	German company experienced in the development of ventilation accessories offers manufacturing and/or research according parts for ventilation masks or individualised face profiles according to customer needs. Basis is their expertise in the development and production of single/ multi-component moulded parts and lattices(grid) made of silicone, plastic, and rubber. Partnership is envisaged in terms of a manufacturing or research cooperation agreement.	TODE20210504001	https://een.ec.europa.eu/tools/services/PRO/Profile/Detail/e4cf5ae4-ba63-44db-bbec-38c2542d41f2 Request the address
17	Summary	Reference	Full text
	A Spanish company has developed a solution for an integral management and decision-making support of surgical processes in hospitals, including features such as: pre-surgical management, smart planning and scheduling of the surgical block, real time view of the surgical block status, patient safety, optimization, physical traceability or patient empowerment. The company is looking for health institutions performing surgical processes interested in acquiring the license to use the technology.	TOES20210503001	https://een.ec.europa.eu/tools/services/PRO/Profile/Detail/b8be4641-6df5-432d-9cfd-bc5f5e97c3cf Request the address
18	Summary	Reference	Full text
	Spanish IT SME with experience in analytics, system interoperability, health information systems and innovation in e-health is looking to form partnerships with industry and/or academia under research cooperation agreements to apply for Horizon Europe calls in the health work programme 2021-22.	TOES20210504002	https://een.ec.europa.eu/tools/services/PRO/Profile/Detail/373ac03b-efc8-480f-a591-f241c1f26b4a Request the address
19	Summary	Reference	Full text
	Spanish Food Training Centre with +20 years of experience and +1.000 students every year (active workers, unemployed, graduate students, including vulnerable community) is looking to take part in KA2 Erasmus + consortia. The centre owns a 500 sqm Food Pilot Plant where hands-on sessions take place. This Pilot Plant reproduces the environment of a Food SME, so it is an ideal place for training worker skills in a relevant industrial setting. Research cooperation is sought.	TOES20210505001	https://een.ec.europa.eu/tools/services/PRO/Profile/Detail/0435dbe2-34ec-4b98-be2b-0b9b8dad9ee2 Request the address
20	Summary	Reference	Full text
	Spanish company working on technology solutions in the cloud has developed an application to monitor all events stored in the folders. This software allows controlling any changes that people have made in the documents. It allows alerts on the processes of the tasks and to continue with the operations. The company offers themselves as partners to cooperate in the digital transformation process under a commercial agreement with technical assistance.	TOES20210510001	https://een.ec.europa.eu/tools/services/PRO/Profile/Detail/c0706ce2-e187-41f8-b209-c867dba215b7 Request the address
21	Summary	Reference	Full text
	A Spanish biotech SME focused on microalgae technology has developed a technological solution to recover waste from the agro-livestock industry (slurry). The result is a liquid fertilizer rich in free amino acids from slurry and microalgae. A license agreement is sought with a company to implement the technology in its business.	TOES20210518001	https://een.ec.europa.eu/tools/services/PRO/Profile/Detail/03808e06-b669-445e-8039-dd35dd183ef1 Request the address
22	Summary	Reference	Full text
	This young company based in south Italy, making leverage on a team of scientists, engineers, developers, and also a network of providers, can offer mainly R&D engineering services from conceptualizing a new product to production, also providing the requested components. The company, that can develop hardware and software products, is looking for a partnership in research projects - with a special EU funds expertise - about tech&engineering for different applications needs.	TOIT20210510001	https://een.ec.europa.eu/tools/services/PRO/Profile/Detail/5dc71ecf-6aca-49ee-a3b4-45d17f3c0288 Request the address
23	Summary	Reference	Full text
	A Polish company with extensive experience in research, development, and fabrication of innovative photonic solutions for industry application is looking for business and research partners. The company specializes in innovative optic fibers for many different fields, especially for tailored solutions with good quality. The type of cooperation may vary, academia is sought for joint further development and industry for technical or commercial cooperation.	TOPL20210510001	https://een.ec.europa.eu/tools/services/PRO/Profile/Detail/e55e2a87-0600-4e3c-99ae-8eeb94926ae0 Request the address
24	Summary	Reference	Full text
	A Polish research institute of robotics and automation offers innovative beveling technology for industry. This robotic technology can be used for beveling (chamfering) parts made of metal plates. The institute is seeking commercial agreements with technical assistance with manufacturers from various branches, such as the automotive branch, metal processing, mechanical engineering.	TOPL20210512001	https://een.ec.europa.eu/tools/services/PRO/Profile/Detail/4b733190-598a-4f79-81d6-f1a3d5e1ccfe Request the address
25	Summary	Reference	Full text
	A Russian company has developed a software package designed to simulate the dynamics and kinematics of flat mechanical systems. This software is used to study the dynamic behavior of machines and mechanisms. The company is looking for manufacturers abroad in sectors such as electronics or transport, for cooperation under a license agreement.	TORU20210517001	https://een.ec.europa.eu/tools/services/PRO/Profile/Detail/ebd8e93f-9890-440f-bea5-2fd984a5ba4 Request the address

26	Summary	Reference	Full text	
	The Russian company from the Sverdlovsk region has developed innovative technologies for the treatment of storm and waste waters, purification from radionuclides and purification and conditioning of drinking water. The technologies have been introduced by a number of large Russian companies. The company works in partnership with the project company and can implement various projects based on the technical conditions of the clients. The company is ready for manufacturing agreements.	TORU20210518001	https://een.ec.europa.eu/tools/services/PRO/Profile/Detail/1bfe684e-7818-4a5c-a7b3-e094d689c406	Request the address
27	Summary	Reference	Full text	
	A Ukrainian SME has developed a new device for irrigation nasal cavities diseases. The experimental work carried out by the researchers of the company has allowed developing a device that allows cleaning and irrigation of nasal cavities more precisely without use of punctures, reducing the risk of infections. The company is looking for industrial partners willing to license the technology or to reach a technical cooperation agreement to further develop the technology.	TOUA20210402001	https://een.ec.europa.eu/tools/services/PRO/Profile/Detail/e8094396-ae53-4872-a66a-14895f2762d0	Request the address
28	Summary	Reference	Full text	
	A Ukrainian IT design company has experience with a variety of projects. The company created an online tool that helps create a smart economy in the furniture, and construction sectors. The tool is designed to solve the problems of 3 audiences: end-users, interiors/furniture manufacturers, architects, and designers, in a collaborative manner. The company is looking for opportunities to test its technology in a real market. The company wants to establish a technical cooperation agreement	TOUA20210515001	https://een.ec.europa.eu/tools/services/PRO/Profile/Detail/98bffcbb-8af7-40d2-8723-7e05cbf5e1f7	Request the address
